

Web Browser Translation Instructions

You can easily translate web pages into different languages using these steps in your preferred browser.

Google Chrome:

1. Open Google Chrome browser on your computer.
2. Go to the web page you want to translate.
3. Right-click anywhere on the page (or press and hold if you're on a touchscreen device).
4. In the menu that appears, select "Translate to [Your Language]".
5. Google Chrome will automatically translate the entire page into your chosen language.

Mozilla Firefox:

1. Launch Mozilla Firefox browser on your computer.
2. Navigate to the web page you wish to translate.
3. Look for the translation icon in the address bar (it looks like a globe).
4. Click on the translation icon.
5. Choose the language you want the page to be translated into.
6. Firefox will translate the page for you.

Microsoft Edge:

1. Open Microsoft Edge browser on your computer.
2. Go to the web page you want to translate.
3. Look for the translation icon in the address bar (it looks like a book with a globe).
4. Click on the translation icon.
5. Select the language you want to translate the page into.
6. Microsoft Edge will translate the page automatically.
