PRODUCT SAFETY ALERT: GREENLITE – 36-BULB SEASONAL “LED” LIGHT STRINGS

A number of Local Distribution Companies have contacted the Electrical Safety Authority regarding the GREENLITE – 36-Bulb Seasonal “LED” Light Strings distributed to Utility customers at several exchange events following concerns regarding product safety.

Preliminary assessment of this product has identified concerns in manufacturing that could result in potential electrical shock and fire hazard. At this time the Electrical Safety Authority is working in conjunction with Local Distribution Companies, CSA International, and Greenlite Lighting Corporation on this issue.

To ensure public safety, the Electrical Safety Authority plans to issue a news release this afternoon notifying the public of potential shock or fire associated with this product. In this release consumers will be instructed to contact their Local Distribution Company or Greenlite Lighting Corporation (1-877-255-0007) for further information if they have participated in this exchange program and have received a GREENLITE – 36-Bulb Seasonal “LED” Light String.
