GE Lighting Recalls High-Intensity LED Replacement Lamps Due to Impact Hazard

The Electrical Safety Authority is notifying the public that GE Lighting has announced a voluntary corrective action program for the following product.

Name of Product: High-intensity LED Lamps

Units: 4,031 units sold in Canada.

Manufacturer: GE Lighting

Hazard: The lamp can separate from its base and fall posing an impact hazard to persons below.

Incidents/Injuries: There have been no reported incidents in Canada. In the United States, GE Lighting has received four reports of the lamp separating from the lamp base. No injuries or property damage have been reported.

Description/Models: This recall involves GE Lighting high-intensity discharge (HID) LED lamps. The lamps are used in lighting fixtures for warehouses, schools and gymnasiums. The lamps are 5 ½ inches in diameter by 11 ½ inches long and weigh about three pounds. The lamps were sold in a blue and white carton with “ED37/EX39 base” on the front and “PC: 21259” on the back above the bar code. Recalled lamps have the GE logo and the

following information on the white plastic base of the lamp LED165/M400/740, 165W, 4000K, 20000 Lumens, China and date code K213 or K245.

Sold at: GE Lighting authorized dealers and electrical distributors across Canada. GE Lighting did not sell these products to retailers in Canada, and they are not intended for sale to consumers or for household use.

Manufactured in: China

Remedy: Consumers should immediately contact GE Lighting for a free repair kit and installation guide.

Consumer Contact: For additional information, contact GE Lighting toll free at 800-338-4999 between 8:00 a.m. and 8:00 p.m. ET Monday through Friday, e-mail lightingconcerns@ge.com, or visit www.gelighting.com and click on Product Recall at the bottom of the page for more information

Remarks: These lamps are certified to Canadian Standards by UL. For more information about UL’s product certification process, please visit UL’s web site at: www.ul.com
