Product Safety Alert

Intertek warns of Infrared Zone Heating System due to possible fire hazards

Intertek is notifying consumers about an Infrared Zone Heating Systems bearing cETLus certification mark with control number 3175310.

The supply chain in the U.S., PD Sixty and American Sewing Machine Company, have confirmed that no product was sold in Canada, however the product does bear a cETLus label which means it is eligible to be sold and used in Canada.

PD Sixty's Intertek Certification was terminated May 1st, 2009.

Hazard: The product does not comply with Canadian Standards requirements and may pose a fire hazard. Intertek has identified that two critical components; the over temperature device and the high voltage connector are not approved components.

Description/ Models: CH-750 and CH-1500 bearing cETLus certification mark with control number 3175310.

Direction: Unplug and stop using the product immediately.
